

STEEL FABRICATION AND
INDUSTRIAL PAINTING

PPG High Performance Coatings

THE PPG HIGH PERFORMANCE COATINGS DIFFERENCE:
HIGH QUALITY, FAST DRYING COATINGS,
AND PPG SPECIALISTS TO ENSURE SUCCESS

YOUR CHALLENGES:

**SPEED OF EXECUTION
AND INDUSTRY CHANGES.**

Steel fabricators and blast shops have one thing in common... time is money. You need coatings and a supplier that you can trust to get the job done fast.

Shop application of multiple coat high performance systems and fireproofing are becoming commonplace. Now more than ever, you need a company that can provide products and knowledge to help you maintain a competitive edge.

THE SOLUTION:

PPG HIGH PERFORMANCE COATINGS.

PPG High Performance Coatings can help with products designed to go on easy and dry fast.

WHY PPG?

BECAUSE WE KNOW STEEL.

PPG is based in Pittsburgh, the heart of the U.S. Steel Industry. We've been supplying paints and coatings for steel for over 100 years. Engineers, steel fabricators, blast shops and industrial painters count on PPG High Performance Coatings. We've developed special coating systems that offer fast turnaround while maintaining maximum abrasion and corrosion resistance.

**PRODUCTS THAT PERFORM
IN HARSH ENVIRONMENTS.**

The PPG High Performance Coatings offering includes products that get the job done fast to make you more profitable, and breakthrough technologies that set PPG apart as a supplier of distinction.

PPG Fire Protective Coatings

Pre-construction application of fire protective coatings reduces costly downtime and keeps the applicator out of the critical path of other trades. PPG Pitt-Char XP® offers extreme Intumescent epoxy protection for heavy industry. PPG Firetex™ Intumescent fire protective coatings are suitable for commercial building applications in both solvent and water-based formulations.

PPG High Performance Primers

PPG High Performance Coatings primers eliminate the need to blast off shop primers before the application of high performance topcoats.

PPG Metalhide® 1001 Inorganic Zinc-Rich* primer dries faster than the competition. PPG's Aquapon® Zinc-Rich Epoxy Primer* and Urethane Organic Zinc Coating give you fast turnaround. Our Multiprime® EFD Epoxy Fast Dry Inhibitive Primer features an extended recoat window that can be topcoated with high performance coatings.

**Class B Slip Coefficient under ASTM A-325*

PPG Multiprime universal primer meets the stringent TTP 664 military specification for universal primers. It is a fast dry alkyd that is tough enough to handle epoxy and urethane topcoats.

PPG High Performance Shop Primers

PPG Metalcasé™ shop coat primer is the perfect balance of quality and speed. You can trust PPG Metalcasé to be consistent and offer the same coverage every time.

PPG High Performance Topcoats

PPG Fast Dry 35 and Fast Dry 2500 offer fast dry alkyd performance. Pitthane® Ultra is the industry's best urethane coating for color and gloss retention. Our Pitthane 35 Urethane finish gives you legendary Pitthane performance that can be handled or recoated in just 3 hours.

**OUTSTANDING SERVICE — BEFORE,
DURING AND AFTER THE SALE.**

PPG High Performance Coatings specialists are trained to recommend a complete system to help you achieve production efficiency. Your High Performance Coatings Specialist can help you understand common specification requirements that pertain to surface preparation and painting.

**YOU BENEFIT FROM PPG'S
EXTENSIVE NATIONWIDE
DISTRIBUTION SYSTEM.**

You'll get the coatings you need – when you need them – thanks to our national network of distribution centers, company stores and dedicated PPG High Performance Coatings distributors throughout North America.
